## Hello You!

We know newsletters tend to end on the pile of “ Will read later”. Don’t forget to read this one though. There’s loads of interesting stuff happening with the various Energiesprong initiatives around the world. From interviews with the design competition winners in the UK to Germany's largest housing organisation decided to go climate neutral for their full portfolio. This all in a month where the European Commission has come out with an unprecedented proposal to unlock up to 275 billion per year to drive deep retrofits. Exciting prospects.

## **Vilogia's new Energiesprong project: on a better scale with 160 dwellings**

“Completely renovating an energy-intensive home in 3 weeks”, that's the challenge Vilogia has set itself in Wattrelos. 160 homes will be transformed into net zero energy homes in record time. Net zero energy homes means that they will produce as much energy as they will use for the next 25 years. It's an Energiesprong France revolution!

[Click to watch](#) the film of the first prefabricated elements being installed on the first of the 160 homes! [Read more >](#)

# Canada calling... get involved with the Reframed Lab

The Reframed Initiative is calling on European industry partners to participate in a six-month exploratory design process to develop next-generation refurbishment concepts with the mission to transform existing housing into high energy efficiency buildings. [Read more >](#)

# Experience Energiesprong at the Dena Energiewende Congress 2020 – Sign up now!

“Now is the future!” - Find out everything about a “Better quality of living, a neutral carbon footprint, no higher rent - this is how renovation works” at the Dena Energiewende Congress from 16-17 November. [Sign up now!](#)

As part of Dena's annual Energiewende congress, our experts will report on the advantages of the Energiesprong approach in serial renovation. Whether you are an interested party or a partner - take part and get involved in discussions with us. A diverse programme aims to provide information on future topics relating to energy transition and much more.

## Inspiring ideas and exciting visions in the MustBe0 Design Competition UK

Meet the winners of the MustBe0 Design Competition UK [here](#) and hear about their inspiring ideas! All thanks to Energiesprong UK's partner IET, who filmed the participants in the MustBe0 Design Competition throughout the developing solutions process. To learn more about the aims of the competition, the purpose, challenges and intentions, they took the

opportunity to speak with 5 of the 6 consortia

winners at the Futurebuild event in London (3-5

March). [Read more >](#)

# **New York City Housing Authority (NYCHA) has signed the RetrofitNY Pledge**

RetrofitNY has made a Pledge. The purpose of this pledge is to mobilise the market to enable building owners to retrofit their buildings to net-zero energy (NZE) performance in a cost-effective way, significantly improving their building's value and reducing its construction period and operating expenses, while improving residents' quality of life. NYCHA, which has a total of 169,820 dwelling units in its portfolio, signed the RetrofitNY Pledge and has therefore committed to drastically reduce its GHG emissions by implementing deep energy and net zero retrofits. To date 15

additional social housing owners have signed on, totalling over 280.000 units aggregated under the RetrofitNY Pledge. [Read more >](#)

## **In the spotlight: high rise net zero energy “Flat with a future”**

An ambitious project: the complete renovation of an outdated Intervam flat on the Camera Obscuradreef in Utrecht, the Netherlands.

After a successful pilot with 8 homes that were made net zero in 10 weeks, construction company VIOS refurbished a total of 252 apartments and 15 new homes in the same neighbourhood to net zero energy homes. This was just the starting point for the Housing Organisation Mitros. [Read more >](#)

## **Vonovia wants to become climate-neutral, and is building on serial renovations**

Germany's largest housing company has declared its intention to make its building stock climate neutral by 2050. Serial renovation is an important component in achieving this aim.

*"With around 350,000 apartments in Germany, we know that we can make a difference in terms of climate protection. However, this will only succeed if politicians, tenants, and the housing and energy industries pull together. We need investments and credible efforts on the part of business."* Rolf Buch, CEO of Vonovia. [Read more >](#)

## Are you following us on LinkedIn?

We are in the process of streamlining our social media presence and so we plan to combine our two existing Energiesprong LinkedIn accounts into one. This means that the account that has the word 'International' at the end of it, will be deleted as of 1st December 2020.

From now on, all our latest news and project updates will be posted on our main Energiesprong account here: [Energiesprong](#)

We have loved having all our followers on both accounts, but would like to invite everyone to now follow us (or continue following us) on our combined account. Please follow us here: [Energiesprong](#)

If you would like to hear more news from us, please also follow us on Twitter here: <https://lnkd.in/dCJRV5b>

**Thank you very much for following us on our Social Media. We really appreciate your interest!**

# Stay up to date

To be up to date please follow us on [Twitter](#) and [subscribe](#) to our newsletter.

The European [Mustbe0 project](#) is funded by the Interreg NWE Programme through the European Regional Development Fund.
